Introduction to ML

Monday, 12 October 2020 13:30 (2 hours)

This session is an introduction into machine learning. Machine learning is everywhere in modern "big-data" science. As physicists and big-data scientists, it's a good idea to know a bit about machine learning. The aim of this module is to explore what it means to build a machine learning model and expand on concepts in machine learning that are essential to anyone working in big-data science.
