

Ellen Sandford

- Joined as a PDRA in May in the particle physics group
- Previously at University of Manchester working on dark matter searches with DarkSide-20k for my PhD
 - Expanding sensitivity to lower dark matter masses, to non-standard interactions
 - SiPM sensor testing in Naples for my LTA

- At Liverpool I work on T2K - a long baseline neutrino oscillation experiment based in Japan
 - Primarily on studies of the upgraded near detector
- Also work in the calibration group for Hyper-Kamiokande
