PUBLIC TALK

Artificial Intelligence and Aliens

Discover how AI is revolutionizing the search for alien techno-signatures in data from the world's top radio observatories!

The radio Universe is a noisy place and separating out interesting signals that may point to extra-terrestrial intelligence is a difficult task. In this talk we'll explore how modern methods in artificial intelligence (AI) are now being used to search for alien techno-signatures in data from the world's leading radio observatories.
